

**STYLISH HOLOPHANE ESTILO LUMINAIRES FURNISH WARM LIGHT,
EUROPEAN FLAIR FOR ROADWAYS**
Fixtures are designed for longevity and easy maintenance

GRANVILLE, OH (3/15/11) – European styled Estilo roadway luminaires from HoloPhane ensure long life and a warm white light for urban areas and infrastructures. Designed for use with CosmoPolis™ lamps, the fixtures offer better system efficacies and lumen maintenance than traditional white light sources, and excellent energy savings.

New Estilo luminaires are available with flat glass or sag glass optics to provide IES Type I and II with full cutoff, cutoff and semi-cutoff distributions. They may be used with 60-, 90- and 140-watt CosmoWhite lamps, which offer a color rendering index of 65 to 70 on average.

The fixtures include a new electronic ballast specifically designed for outdoor use that is fully potted to protect components against moisture and dust. With built-in surge protection, the ballast is offered with LumiStep dimming options, which seamlessly integrate dimming capabilities without additional equipment. Fixtures may be ordered with 6-, 8- or 10-hour dimming, or no dimming.

Easy installation, maintenance

Estilo luminaires' universal mount system provides both tenon and arm mounting options, eliminating the need to carry multiple fixtures for a specific project. A pre-wired terminal block allows for quick power connections, and toolless entry simplifies maintenance by providing access to the ballast and optical assembly. Once the latch is disengaged, the canopy is lifted up for service.

“Crews no longer need to handle cumbersome door assemblies during routine maintenance, which improves their safety and efficiency,” said Chris Hutras, HoloPhane product manager.

Color options for many applications

A variety of housing colors allow Estilo luminaires to complement their surroundings, with fixtures available in dark blue, black, brown metallic, bronze, graphite, green, gray, white and as specified.

New Estilo roadway luminaires are CSA listed for wet locations, with IP66 optics and IP44 housing. Suggested applications include municipal streets and public roadways, residential areas, campuses, military bases, industrial parks, hotels and resorts, municipal parks and recreation centers.

About Holophane

Headquartered in Granville, Holophane has been the leader in lighting solutions for 110 years. An Acuity Brands Company, Holophane provides energy efficient lighting systems for a range of commercial, industrial and outdoor applications. For more information, visit www.holophane.com.
