

Ford Field, Detroit Lions; Detroit, MI

Revitalization!

Holophane lighting systems have been contributing to revitalization for over a century.

Revitalization is the key ingredient to bringing community commerce, prestige, culture, pride, and tradition to a city. Newly constructed triumphant structures, like the resurgence of sports complexes, can be the anchor to inspire positive attention and growth.

Let the Lions & Tigers roar!

Inspired by elements of the past and with full attention on the future, the city Detroit, MI has prepared itself for a rebirth in the new millennium. Ford Field and Comerica Park, homes to Detroit's two popular professional sports franchises, have invigorated downtown Detroit. The key element to the streetscape surrounding the stadium architecture is the traditional Esplanade boulevard luminaire by Holophane, supported by a customized decorative pole assembly scaled to perfection. The Esplanade has been engineered to provide uniform lighting for a warm, comfortable, and safe nighttime environment, while evoking visions of yesteryear with a traditional form. Made of authentic materials like its signature borosilicate glass optical lens, this tear drop style luminaire is ideally suited for municipal streets with nighttime pedestrian activity.
