

Reynoldsburg, Main Street, Reynoldsburg, OH

## Tomato Chic!

Reynoldsburg, Ohio, is known as the Tomato Capital of the World. When the city decided to create a more attractive setting for business growth, they knew the streetscape design needed to integrate all elements, including lighting, to craft an appealing atmosphere for residents and visitors. It was critical that the street lighting had to illuminate 5 lanes of roadway and blend with the design.

Holophane had the solution.

## Tomato Chic!

The Mongoose luminaires, with custom Reynoldsburg arms, are mounted on Atlanta poles. The special "Tomato Red" poles have the city seal cast into the bases. Reynoldsburg also decided to have the poles equipped with banner arms, to publicize the numerous city events held throughout the year.

Although appearance and style of the lighting systems is an important consideration, safety and security of the public is of the utmost concern. The Mongoose luminaire with its engineered light distribution is also very effective at reducing unwanted light trespass. The superior photometric performance allows this system to illuminate the 5 lanes on Main Street with a full cutoff light distribution.

Utilizing 320W metal halide lamps, the luminaires were spaced 190' apart and setback 12' from the roadway. This, along with the mechanical features designed into the Mongoose luminaire allow for fast, easy maintenance when required.

Tomato Chic. What's next?

**The Mongoose®**  
features 14 optical systems.
