

NCQLP GSA

NCQLP Announces GSA Mandate for Lighting Certified Practitioners

Holophane has led the lighting industry in innovation and technical qualifications for over 108 years. The Illuminating Engineering Society of North America (IESNA) was founded in our New York offices in 1906, and Holophane continues to remain active in the IESNA, nationally and at the local section level. We also have 54 Holophane associates who are Lighting Certified by the NCQLP. In addition, Holophane has a Lighting Design Department, which is managed by Lighting Certified staff.

Holophane's LC credentialed designers can assist you with...

- **Product application**
- **CAD lay outs**
- **Photometric analysis**
- **Design review and recommendations**
- **Lighting technical support**

We are here to help you comply with the new GSA Facilities Standards. Please contact us to discuss lighting design requirements for your GSA projects.

The following excerpt is from the ***Facility Standard for Public Buildings Services***:

Qualifications of the Lighting Practitioner. Lighting design shall be performed or supervised by a practitioner credentialed as Lighting Certified (LC) by the National Council on Qualifications for the Lighting Professions (NCQLP).

(Section 6.8 Interior Lighting, Day lighting, and Control Systems, p. 189).

**DOES YOUR
LIGHTING PRACTITIONER
HAVE "LC"
CREDENTIALS?**
